## Quizzes and Certification

To obtain a certificate, users must complete all module quizzes successfully. The quiz questions are based on the information provided directly in this course, including extracted summaries and definitions. However, the questions are not based on information provided in the externally linked documents or websites. Module quizzes are randomized from a bank of questions each time a quiz is taken. Therefore, it is highly recommended that users review the instructional material prior to completing the quizzes.

Users are required to complete a quiz following each module, except for the Introduction module. To receive a

certificate, all quizzes must be completed with at least 80% accuracy (or as specified using the new IRB feature for 100%). Upon successful completion of all quizzes, the user will be given access to the Certificate of Completion.

## Resources

Please use the **Resources (/resources)** tab to review terminology and definitions, course links, and additional resources and websites. The course is designed to be comprehensive for users to review the content of required information in conjunction with an examination of other source documents and websites pertinent to Good Clinical Practice and research regulations.
